Dumor's newly developed
NC GUILDPRINTER

IMPROVE THE IMAGE OF YOUR PRODUCTS!
ADD VALUE TO YOUR PRODUCTION!

KEY FEATURES

- Fully automatic process
- Auto feeding just insert the substrate
- Auto sheet registration
- Driven by PC for the image using standard PC software (no specialized RIP needed)
- Suitable for most non porous substrates
- Suitable for most lightly grained/ textured substrates
- For sheets up to 320 wide x --- long
- For substrates up to -- mm thick

DUMOR!

The new Dumor **NC GUILDPRINTER** will apply a thin metalized coating to most substrates.

SPECIFICATIONS

Material type	Sheet material
Paper feed quantity	Single sheet
Paper feed type	Automatically
Positioning type	Automatically
Foil saving function	Automatically
Printing type	single/continuous
Off-line working (remember last job)	Yes
Max feed width	350mm
Max print width	252mm
Max print thickness	3mm
Printing resolution	300x300dpi
Interface	USB
Max print speed	40-100m/hr
Printer head working life	150000m
Operating temperature	5°C-40°C
Power Supply	AC240V, 50/60Hz
Max power consumption	200W
Foil Type	Thermal type hot stamping foil
Material Type	Paper, leather, adhesive sticker, photographic film, non-woven fabrics, etc.
Machine size	80x50x40cm
