

TECNICAL BULLETIN 9

Technical info

September 2015

Hi All

Here is a technical bulletin with information covering several different products. Please read carefully and translate for your tech service as needed.

TECHNICAL BULLETIN NR 9

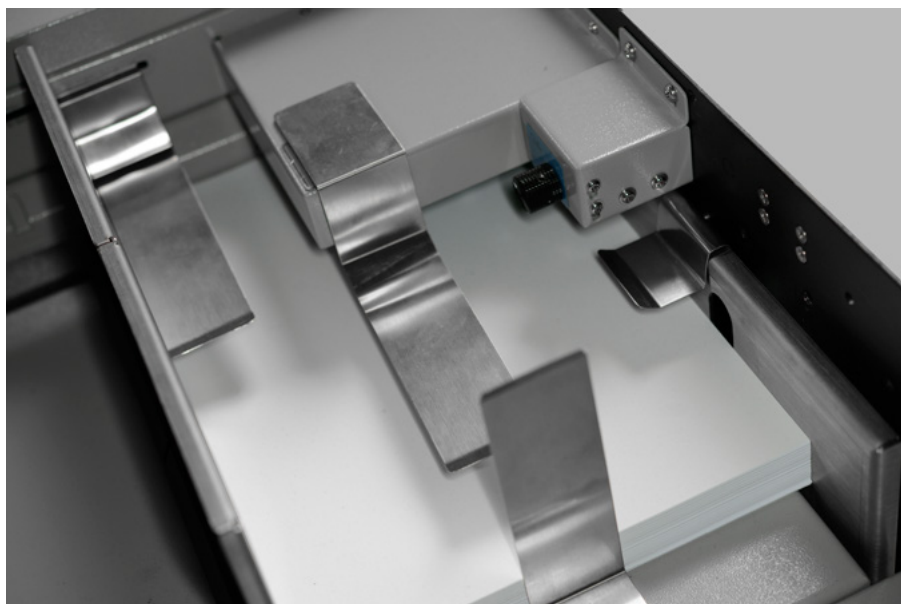

Subject: Light paper feeding kit for **Multi Air** top feeding machines

There are 2 levels

Simple guide kit consisting stainless steel strip guides x5 pcs

This will guide most light and mid weight papers perfectly

The picture attached shows the correct installation of the guides

Advanced guide kit comprising of the above and 2 minor machine modifications that can be done at your office or in our tech repair centre in Soest Holland

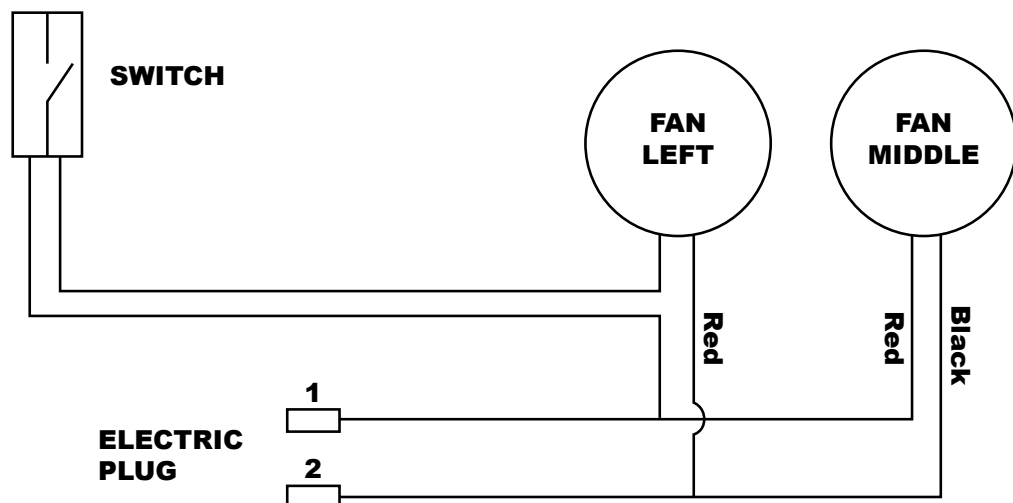

The machine modifications are :

- 1- Drilling and tapping 2x M4 holes to raise the tray detector switch block by ca 5mm
- 2- Adding a hole in the back cover 12x12 mm to accept a rocker switch to cut out nr 2 blower fan to reduce the amount air blast on light paper.

These kits are not standard fitment and will be chargeable Dumor crew

Have fun and remember Dumor machine are easier to repair!
